

# PLAY DOUGH SUN

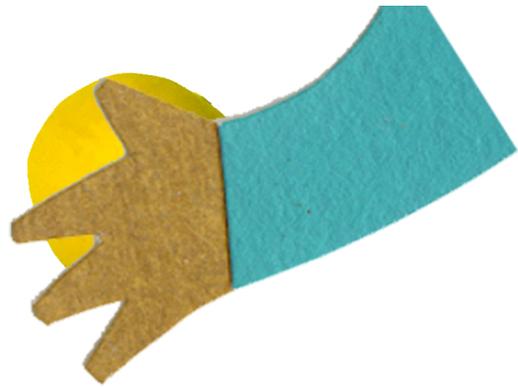

**Materials:** Yellow play dough

Roll a ball of play dough with your baby.

Let's make **round balls**.

What happens if we  
squash this **ball flat**?

It's a **circle**!

# RAIN AND THUNDER

**Materials:** Four small plastic containers with secure covers, two filled half way with uncooked rice, and two filled with a few pennies

As your baby shakes each container, talk about the sounds they make:

*Soft like rain.*

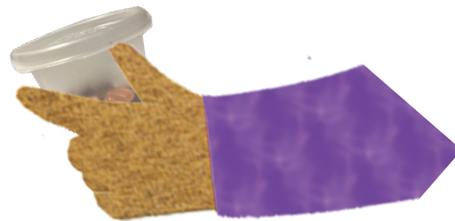

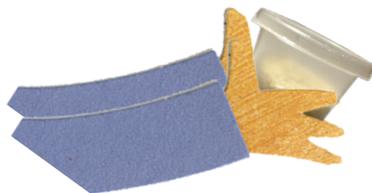

*Loud like thunder.*

Take turns: your baby shakes one container, you shake the other.

*Loud, soft, loud, soft...*

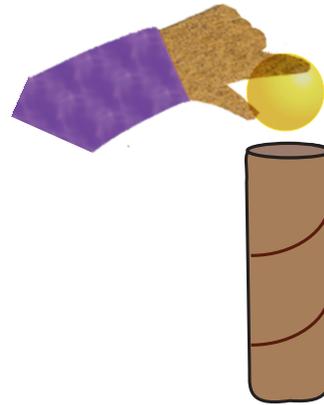

# WHAT FITS?

**Materials:** Two toilet paper tubes, several small toys that fit in the tubes, and two toys a little too big to fit in the tubes

Encourage your child to explore which toys fit in the tube.

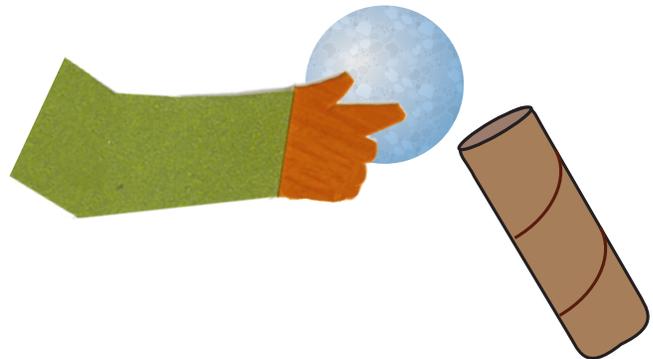

Find a toy that will fit in the **tube**.

Where did the **small** toy go?

This **big** toy will not fit in the **tube**.

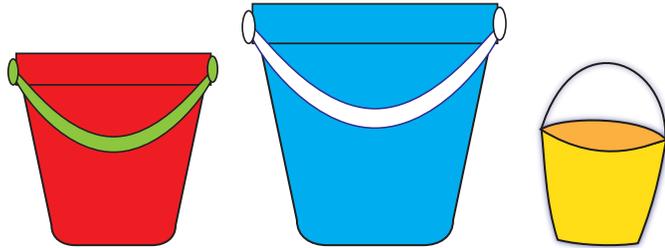

# SAND BUCKETS

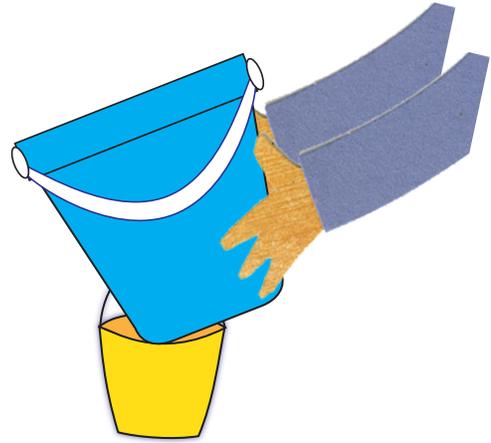

**Materials:** Several plastic sand buckets in different sizes and colors

As your baby plays with the buckets, talk about sizes and positions:

What fits **inside** this red bucket?

The blue bucket is too **big** to fit **inside** the yellow bucket.

You put the yellow bucket **inside** the red one and the red one **inside** the blue one!
